

Media kit

GoBoost.AI is a boutique AI agency and digital engineering firm. We design smart agents, automate workflows, and implement ERP/CRM/Work-OS systems that connect data, decisions, and operations. From model-tuned, domain-aware GPTs to full enterprise integrations, we deliver measurable ROI—shortening cycle times, reducing costs, and improving customer experience. Founded in 2023, we serve startups, SMBs, and enterprises across Israel and the U.S., combining strategy, engineering, and business acceleration into one execution engine.

Purpose-built AI agents and enterprise systems—engineered to scale your business.

We help companies reach their next phase of growth by embedding AI where it matters: in processes, systems, and decisions. Our teams build custom agents, automate back-office and customer flows, and implement ERP/CRM/Work-OS foundations. The result is faster operations, live visibility, and predictive insights—delivered in weeks, not months.

Core Services

AI Agency

Custom agents & automations (MCP/A2A/ACP/ANP), private/domain GPT, • predictive intelligence.

Digital Engineering

ERP/CRM/Work-OS implementation, API integrations, data pipelines, BI dashboards, cloud/on-prem

Business Acceleration

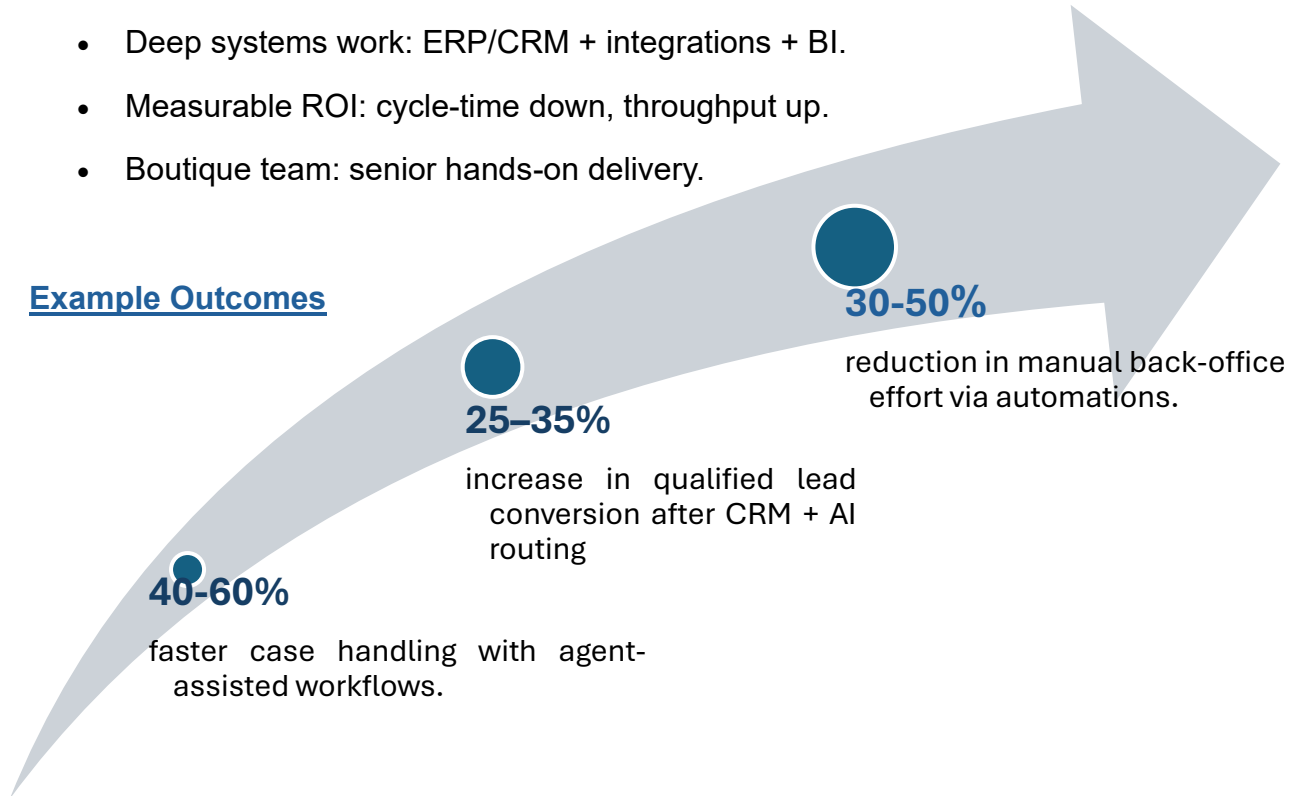

Decision automation, GTM ops & experimentation, exec dashboards, training & enablement.

Why GoBoost

- Strategy-to-ship in weeks (POC → production).
- Secure private GPT tuned on your data & SOPs.
- Deep systems work: ERP/CRM + integrations + BI.
- Measurable ROI: cycle-time down, throughput up.
- Boutique team: senior hands-on delivery.

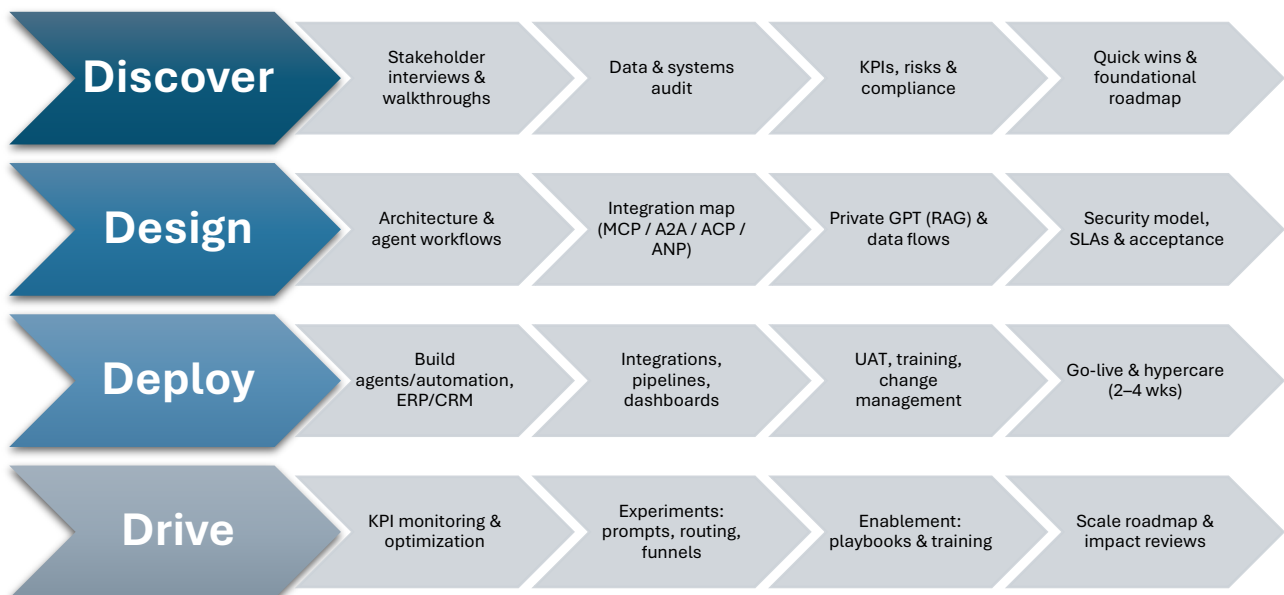

Example Outcomes

How We Deliver

Discover → Design → Deploy → Drive

We meet our customers where they are. Low-risk, outcome-first, built to ship value in weeks.

Verticals Served

IT/Professional Services, Financial Services, Real Estate, Manufacturing/Industrial, Education, Retail & eCommerce, Public Sector.
